

FACILITATES P A C E S

Location Central London
Area 2,000 sqm / 21,500 sqft
Duration 9 weeks
Sector Higher Education

3rd & 4th Floor Multifunctional Teaching and Staffing Space

Facilitate Spaces were appointed as the main Design & Build Contractor from stage 4 tender to fully strip out and refurbish a central London Higher Education Campus, which also doubles as the headquarters to the Universities executive team.

The floors were reconfigured to facilitate a management hub providing new power, data and lighting infrastructure for a functional, open and productive work environment. Providing a mix of enclosed offices from 1-person to 10-person, meeting rooms, open planning work zones and teaching / lecture rooms.

A contemporary lighting scheme was delivered to illuminate the understated, yet contemporary colour scheme that rolled out across all rooms.

The work was completed during a tight programme over the summer period to ensure the space was ready for the staff and student return. Our design and management team worked alongside the appointed Building Control officer to deliver a safe environment for the end users, as we strongly adhere to all fire compartment and building regulation requirements.

Project Facts

- In house, design and build scheme
- Full strip out and installation including new finishes throughout
- New power, data and lighting infrastructure
- BS and BM Trada compliant fire doors and compartments
- High standard multifunctional spaces delivered
