HEALTHCARE ❯

Molex Connected Enterprise Solutions

molex

Providing effective services on a decreasing budget is the challenge facing today's healthcare providers.

Technology continues to enable leaps forward in diagnostics, treatment, security, efficiency and data management, but as it evolves so do its demands. Healthcare infrastructure must provide the reliable, cost-effective performance needed today, but without restricting what can be achieved tomorrow.

Modularity, scalability and emerging performance capability are the key to achieving ever more with less.

THE CHALLENGE

The ability to upcycle previous infrastructure is a key driver in maximizing capital investment. Reusing hardware such as frames, patch panels, enclosures and outlets minimizes the material cost of increasing performance.

By introducing a reuse-recycle ethos early in the process, installations can be layered to maximize utilization of existing equipment and streamline future upgrades.

THE SOLUTION ❯

Molex's modular platform and Reuse - Rethink - Recycle philosophy allow seamless integration of communication mediums - be it audio visual, optical fiber or copper cable based communications. From data center to campus facility, from building distributor to patient room outlets, Molex's Synergy Footprint allows for full customization while reducing the required number of parts to achieve the result.

With Molex's cost effective, modular and scalable data transport platform, medical facilities are able to invest more into their most important element – their people.

molex

PRODUCT RANGE: CABLING ❯

COPPER SOLUTIONS

With high performance and excellent reliability, our range of copper twisted-pair cabling is trusted by healthcare organizations worldwide. Developed with the most demanding applications in mind, our range includes shielded and unshielded products from Cat6a to Cat7 for all your data center, structured cabling, communications and PoE applications.

OPTICAL FIBER SOLUTIONS

The Molex fiber optic range provides a versatile end-to-end solution capable of running the most demanding network protocols. Robust and durable, our products will maximize your ROI in networks that will continue to perform for years. From backbones to fiber-to-the-desk to data centers, Molex optical fiber cable provides superior bandwidth, speed and security.

ZONE CABLING

The ability to rapidly reorganize workspaces starts with a dynamic network architecture. Molex zone cabling introduces a new dimension of flexibility to organizational facilities with easy connection and reconnection of devices and hardware, from desktop computers, door entry system to medical equipment and IoT devices.

molex

PRODUCT RANGE:
CABLING ❯

SHIELDED SOLUTIONS

Preserve signal integrity across your network with our shielded cabling solutions, designed for exceptional reliability at extreme speeds with greater bandwidth and headroom. Our shielded solutions support growing data transmission requirements with less interference and offer a greater reach to help minimize costs.

NETWORK CONVERGENCE SOLUTIONS

Effective business management system integration helps you manage converged connections. Our solutions help optimize performance and control across a range of healthcare applications, including PA systems, security and safety automation, communication, patient entertainment and more. With color-coded connection systems, you can safely and easily identify connections for improved system-wide maintenance.

SECURED PRODUCTS

Safeguard your systems from disconnection with our range of lockable patch cords, panels and enclosures. These products maintain data transmission with reduced risk of interference and also help protect patient data, even recording access details for your team to review and audit to optimize performance.

molex

PRODUCT RANGE:
ANTIMICROBIAL SOLUTION ❯

Antimicrobial products add additional protective properties to standard cleaning processes to help in the maintenance of a clean environment.

Wallplates

- Smooth "polished surface" facilitating easy wipe down

- Embedded antimicrobial materials in the plastic work 24/7 to inhibit the growth of bacteria, reducing the risk of cross contamination

- Angled outlet – facilitates correct bend radius of the patch cords essential for data continuity at high performance

Cat 6a F/UTP Patch Cords

- Antimicrobial materials – assist in the prevention of propagation of bacteria resulting from human contact

- Anti-snag boots protects the RJ-45 connector's lock from being snapped off easily. Ideal for high insertion cycle and ease of access.

- LS0H sheath – low halogen cable sheath emits limited smoke and no halogen even when exposed to high sources of heat

molex

PRODUCT RANGE:
HARSH ENVIRONMENT
SOLUTION ❯

Harsh environment jack, wall plate and patch cords, ideal for areas within the hospital that are subjected to vigorous use and cleaning.

Wallplates

- Stainless steel wallplates facilitate easy wipe down and mate perfectly with the Molex Cat6A Locking Bulkhead RJ-45 Connector

- Available in multiple port configurations – popular sizes 1, 2, 4 port sizes

- Double Sided - Polished and brushed look combines practicality with aesthetics
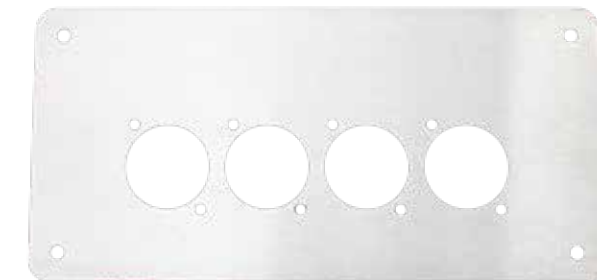

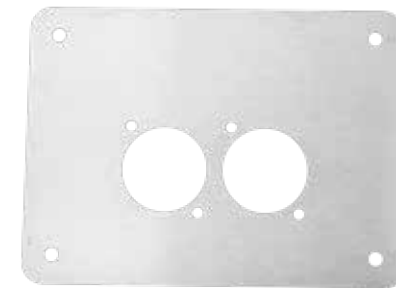

Rugged RJ-45 Locking Outlet

- Ruggedized connector with Cat6A component compliance according to ISO/IEC 11801 and TIA/EIA 568-C.2. Locking function enables secured connection

- Shielded construction protections against EMI and a high interference environment

- IP65 Rated – Molded rubber grommet seals against water/dust ingress

molex

PRODUCT RANGE:
SMART BUILDING
SOLUTION ❯

Connected by safe and flexible Power-over-Ethernet (PoE), CoreSync sensors, lighting and devices help maintain safety, optimize space utilization, and save energy.

Smart hospitals

- Integrated sensor technology to better understand staff, patient and care patterns and respond automatically to personal preferences

- Automatically controls lights and adjusts the color to resonate with natural human biorhythms

- Provide data on utilization of rooms and other equipment

- Single cable to provide both data and electrical connectivity to IP devices, lighting, WAPs and BMS.

Protect staff and patients

- Integrate BioVitae antimicrobial lights to help protect against the spread of bacteria and viruses

- Emergency lighting guides occupants safely to exits in the event of an emergency

- Integrate and control PoE security systems.

molex

PRODUCT RANGE:
DATA CENTER SOLUTION ❯

Molex data center products deliver performance and security for high-density data center applications. High quality, robust manufacture ensures durability and long lifecycle through multiple installations

High Performance Communication

- Modular platform ideal for consolidation of data center and hospital components Inter-operability for speed of replacement

- Shielded platform ideal for data center implementation and horizontal implementation within care facilities

- Reuse - Rethink - Recycle product design philosophy – lifecycle extension and seamless integration – means less down time in data centers and healthcare facilities

- Hybridized Platform allows for quick interchange and spatial efficiency irrespective of Physical Layer topography

VERIFIED ANTIBACTERIAL PERFORMANCE

Molex Antimicrobial products have antibacterial properties that have been verified in accordance to ISO 22196.
This test demonstrates the efficacy of protection against Staphylococcus aureus and Escherichia coli.
Molex Antimicrobial products are intended as part of an effective sterilization protocol and not a substitute.

ABOUT MOLEX

Trusted by leading organizations worldwide, Molex is known for the quality and reliability of our products. We work with hand-selected, Molex-trained installers and consultants to ensure you receive the highest quality of service end-to-end.
With exceptional build quality, our products are designed to be used and re-used, delivering reliable high performance every time.

HEALTHCARE CUSTOMERS

- Sutter Health, USA

- Nanjing Children's Hospital, China

- Discovery Health, South Africa

- Department of Emergency Services, Australia

- Kalinga Institute of Medical Sciences, India

- Lady Cilento Children's Hospital, Australia

- Olympia Eye and Laser Centre, Namibia

Our Approach

At Molex, we take a multidimensional, consultative approach to help you plan your healthcare infrastructure and prepare for next-generation demands. With a broad portfolio of products and solutions designed to offer high performance and comply with industry standards, our global team of experts will work with you at every step to develop a comprehensive solution. Working with Molex can help you meet your current and future infrastructure requirements to serve the needs of patients and staff at all hours of the day.
